Abstract: Owners and operators of large household and commercial appliance surface coating facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 63, Subpart A), as well as for the applicable specific standards in 40 CFR part 63 subpart NNNN. This includes submitting initial notifications, performance tests and periodic reports and results, maintaining records of materials usage, and any period during which the add-on control system is inoperative. These reports are used by EPA to determine compliance with these standards.

Form Numbers: 5900-564.

Respondents/affected entities: Existing and new facilities that perform surface coating of large household and commercial appliances.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart NNNN).

Estimated number of respondents: 10 (total).

Frequency of response: Initially, semiannually.

Total estimated burden: 4,380 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$524,000 (per year), which includes \$6,350 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an increase in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This ICR incorporates the incremental burden from recent amendments to the rule as part of a Risk and Technology Review (RTR) in July 8, 2020 (85 FR 41100). The prior RTR amendments removed the excess emission and SSM reporting requirements, resulting in a small decrease in burden hours. The prior RTR amendments also adjusted an error in the previously approved ICR and corrected the burden hours to record and disclose information to two hours per week, which is reflected in this ICR as an increase in burden. The growth rate for this industry is non-existent, with no new respondents expected.
